## Our Alliances

### Lenovo Australia

[www.lenovo.com.au](http://www.lenovo.com.au)

Lenovo strives to be a new world company that makes the world's best-engineered PCs for our customers.

They operate as a company uninhibited by walls or organizational structures using world sourcing to harness the power of innovation across our global team.

They design innovative and exciting products and services to meet our customers' needs.

### IBM Australia

[www.ibm.com.au](http://www.ibm.com.au)

IBM Australia is a leading supplier of information technology, software and services in Australia.

Their focus is on helping customers of all sizes to adapt and prosper in the online world.

Their extensive range of products and services help organisations to take advantage of new opportunities presented by Internet-based technologies, building on their existing technology investments.

## Do you need reliable I.T. at an affordable price?

Ronmar computer consultancy understands the problems that every business faces with its I.T. needs. Many businesses in the Mackay region pay a premium price for poor service. The service is low quality and multiple callouts are needed to fix simple problems. This usually means unnecessary expenditure for your business.

We don't see our customers as dollar symbols. We pride ourselves on personalized service at an affordable price. We deal primarily with business/corporate clientele so we know exactly what type of service is right for your business. However with a new retail shop front on the horizon we are looking to move onto a whole new level of service for our clients.

Here at Ronmar we understand what it can be like when changing I.T. providers. We've heard many people say "better the devil you know than the devil you don't". We want all of our customers to be confident in the support and knowledge that we provide.

We are offering the following service to our new corporate clientele.

- *1 free initial consultation.*
- *Documented security audit and inventory of your network which is included in this consultation.*

## Still not convinced?

**Clientele Australia Wide** – Ronmar have multiple clients Australia wide and with multiple remote accessibility features enabled can provide excellent service to branch offices not in the same geographical location as our retail shop front.

**Corporate Auditing Specialists** – Audit networks between 50-500 computers all over Australia. Ensured these networks were secure, licensed correctly and were achieving maximum efficiency with their IT purchases.

**Coporate Networking / Security Specialists** – Using high quality equipment and 18 years of combined know how. Ronmar can setup a fast network and ensure you have no unwanted visitors.

**IBM / Lenovo Certified Business Partners** – We sell only business grade equipment to people who want reliable workhorses. Not only do we sell the best equipment on the market to our corporate clientele, but we offer the best after sale warranty and service that the Mackay region has to offer.

**IBM / Lenovo Authorized Service Center** – Compared to other retail stores in Mackay, we only sell equipment that we can service after the sale. Other chains in the region focus on the sale and getting you out the door, we focus primarily on after sales service. We are the only authorized IBM / Lenovo service center in the Mackay region. This allows us to achieve our after sales service goals.

So if you are sick of dealing with over-priced, sub-standard I.T. firms, please give us a call, I'm sure you will not be disappointed. For more information on services we provide please click [here](#).

Yours Sincerely,

Ron Hazell – Director – Ronmar Computer Consultancy
